Get More Bang For Your Buck

Looking for a way to maximize your stability storage space AND save money? If you are currently using, or considering using, reach-in chambers for your storage, you may benefit from switching over to a Parameter free-standing conditioned walk-in room. The move can save both space and money by maximizing your square footage, allowing for a significant increase in shelf space and reducing equipment costs.

[Check out this comparison.](#)

Parameter Celebrates 40th Anniversary

More than 100 folks gathered in late April to mark this milestone. For this manufacturer of humidity and temperature control systems, it's all about family, quality products, and unsurpassed customer service.

New UV Lamp/Quartz Tube Replacement Video

To ensure the best performance of Parameter conditioners, we recommend replacing the UV lamp and quartz tube annually. We've created [this helpful video guide](#) to show you how to do it

Parameter designs and manufactures the most precise temperature and humidity control chambers—with a remarkable control constancy of +0.5% RH. Plus, Parameter equipment leads the industry in energy efficiency.

We are honored to provide equipment to customers throughout the world, and we would love to continue to communicate with you periodically about new products and updates. We'll always treat your information with the utmost care and will never sell it to other companies for marketing purposes. Please confirm your preferences.
